

The purpose of the Route Map is to indicate typical routes to the various grades of Institution Membership from a variety of starting levels of engineering knowledge and understanding.

It demonstrates a selection of the available opportunities, however the range of possibilities is much greater than can sensibly be shown. It is for example possible to move between membership categories by means of additional educational attainment, further professional development or a combination of both. For further details contact Claire Robertson Membership and Marketing Manager on 01509 282442 or claire@igem.org.uk

The full requirements for professional registration are set out in the United Kingdom Specification for Professional Engineering Competence - UKSPEC

The applicability to individual candidates of the technical report option now available under UKSPEC is subject to approval by the Institution

If you have any comments on the route map or suggestions for improvement, please also contact Claire Robertson
